The training ranges from behavioral modification, to basic obedience, confidence boosting and more. We look to provide you a life changing experience that can help strengthen the bond between pet and parent when the parent may not have the time, patience, knowledge or availability. Each week that the dog is here old information becomes a habit and new information is absorbed and becomes a pattern. The dog is continuously stimulated physically and mentally providing the parents a dog that is pattern cognizant, listens and understands its role upon completion. The more time the dog is at the facility the more the dog will pick up on the desired behaviors and how it is to conduct itself. The board and train is administered through weekly intervals. Upon completion of four weeks or more the parents receive 1 free private lesson.
